EMERGE™ 6-Day Training – Presented by Elvis Lester, MA, LMHC, NCC, AMT

Eye Movement Emergence Reemergence & Guided Expression™

Earn the Certified EMERGE™ Advanced Specialist (CEAS)

Cost: $1390

Date: To Be Announced, 2023   TIME: 9:00 AM – 6:00 PM   40.0 CE Hours

Location: Neurocise® Studios – 600 S. Magnolia Ave., Ste. 160, Tampa, FL.

Or call 813-221-5466 to reserve your space.

Certified EMERGE™ Practitioner Training

Introducing Neurocise®, EyePointing™, NeuroPointing™ & NeuroTrance™

Complete Eye Movement System to work with Memory,

Traumatic Events & Achieve Optimal Desired States

Attend this workshop & learn how to use these tools for mental-emotional control, collapse nonproductive states quickly & access more positive & empowering desired states with ease. Come learn about how you can utilize tried & proven eye movement patterning & eye scanning techniques to make lasting & profound changes perceptually, conceptually & emotionally. Here we will work directly with how you & your clients access information & memories & how you actually create & construct representations internally through your sensory channels (VAKOG).

Here, you will be introduced to:

- **EyePointing™, NeuroPointing™ & the "basics of Neurocise®"**
- **The EMERGE™ Model &… Desired Response Patterning™** utilized to emerge new & more productive & positive (desired) representations & response features & patterns.
- **NeuroTrance™ to reinforce Learning & Memory of Desired Response Patterns**

In this workshop, you will be experiencing guided trance & participate in experiential exercises & supervised practice. You will leave with a powerful system to gain more mental & emotional state control & mastery of your own internal processes & representations. These advanced skills & abilities will become essential tools to support you in transforming the way you & your client's sense & perceive & evolve how they think & feel mentally, emotionally & physically.

With EyePointing™, NeuroPointing™ & EMERGE™ you use eyepoints & eye movements to cue & anchor (collapse & form) internal representations (visual-auditory-kinesthetic) & transform the way clients express themselves almost instantaneously. With eye accessing & movement as well as eye scanning, clients provide highly valuable information about representations involved in their memories & their unique recall of events or experiences. By identifying the "submodality locations" of the representation (held in mind/brain & projected with Eye Accessing & Movement) we work with the very structure of representation to discover & uncover worthwhile information about how this "see-hear-feel" impacts & influences the person (mind-brain-body creations).

Once we have addressed the neuropoints involved (read-resolved-released its signal value), a natural resolution is expected & issues will likely release, neurally integrating positively. This allows us to clear these "neuropoints & eyepoints" that clients have developed (as neural cues) or that have become problematic or led to so-called "problems or issues" that have previously been negatively emotionalized (so-called "traumatic experience/memories").

Learning Objectives
Participant will be able to:
- Learn the VAK (Visual-Auditory-Kinesthetic) Model & how to access individual senses to adjust & transform experience with Neurocise® & EMERGE™ at the beginning of work with clients. Learn how to use VAK predicates – including time predicates
- Demonstrate ability to work with Visual processes – Enhance Visual & Sensory Acuity Skills.
  - Identify Sensory Channels involved & engaging in representations/memory.
  - Demonstrate ability to use the Visual Field to work directly with the elements of representations (Visual-Auditory-Kinesthetic Sensory Modalities & Submodality Features – Size, Location/distance, brightness/color, tone, tactile/sensation/etc.).
  - Demonstrate ability to engage sensory structures successfully in your work with Traumatic Memories & Post-Traumatic Stress to effect desired change.

- Identify Eye Movement Patterns & Eye Accessing Cues involved in representations & learn how to utilize these cues, movements & patterns to change representations, minimize negative or limiting features & optimize & maximize pleasant features.
    - Use Bilateral Eye Accessing Movement – Left/Right Visual Field (Exercises) to work with past (reconstructed) representations (memories) & future (created) imaginal representations to set goals & insert & seed resources into future situations.
    - Learn to detect & clear EyePoints & NeuroPoints – Moving eyepoints in & out of the visual field, well-forming with them as anchors (NeuroPoints).
    - Use Eye Movement to move the response to a different location in the visual field, off the visual field – to interrupt & clear it & reemerge a neutral or Desired Response.
    - Set Up the use of Eye Accessing Cues & Eye Movement with clients.
    - Conduct Submodality (SM) Shifts – Identifying SM Drivers
    - Learn EAC (Eye Accessing Cues) – How to Ask precise questions to Elicit & Access Desired Responses with EAC Questioning – Eye Movement. Anchoring & Validating
- Demonstrate the ability to work with Disassociation & Association & Chunking for Positive responses & work with Negative Features which can be used to detail desired responses with clients & direct expression leading to disintegration/integration of responses.
- Access memories & reference experiences to "read, resolve & release information" in well-formed ways, generating desired responses.
- Introduce the Well-formedness Conditions of Desired Outcomes – Well-form Desired Outcomes & Access VAK of Desired Response.
- Demonstrate ability to collapse non-productive states & integrative resource state anchoring.
- Demonstrate ability to "Insert Resources into a past experience" (Timeline), adding new learnings & updating memories with required resources.
- Demonstrate the ability to use NeuroTrance™ techniques – Conducting neurocise & eye movement exercises in trance to reinforce learning & memory/resource consolidation.
- Utilize Practicum Experience to apply techniques/methods with supervision to specific issues.

Approved Training by: Division of Medical Quality Assurance – State of FL CEU Provider #BAP289 – CE Broker #50-1190 – Exp. 3/31/2023. This course meets the standards for approval of continuing education courses set forth in Rule 64B4-6.002, F.A.C, & is taught by qualified teacher of hypnosis as defined in Rule 64B4-7.003.

Teaching Methods: Presentation, Demonstration, Supervised Practice/Exercises; Debriefing, Discussion, Review of Exercises, Question & Answer Sessions for Daily Applications of Skills/Techniques, Closed-Eye Induction, Handouts & Multi-media resources.

Your Master Trainer: **Elvis Lester, MA, LMHC, NCC, MAC, ACHMT** a Licensed Master Trainer of NLP In Hypnosis (Society of NLP), Qualified Teacher of Hypnosis (State of FL) & Licensed Mental Health Counselor (State of FL) teaches this course personally.
